DataStudio setup for rotation with constant acceleration

Physics 23 Lab O5

Missouri University of Science and Technology
DataStudio icon on desktop

[Image of a desktop with an icon circled, labeled DataStudio]
Create Experiment

How would you like to use DataStudio?

- Open Activity
- Enter Data
- Graph Equation
- Create Experiment
Left-click input 1

Click any channel to add a sensor.
Add Rotational Dynamics Apparatus > OK
Check Angular Velocity only
